

# HD 10 D-16

Video distribution amplifier

**LMP**  
Lux Media Plan  
/

The HD 10 D-16 is a compact video distribution amplifier, distributing one HDSDI input to six HDSDI outputs whilst equalizing and reclocking the signal. It automatically detects the datarate of the distributed HDSDI signal according to SMPTE 240M, 274M and 292M as well as SDI SMPTE 259M.

## Features

- reclocker
- equalizer
- 1 to 6 distributor

## Technical Specifications

Input	HDSDI SMPTE 240M, 274M, 292M SDI SMPTE 259M
Output	6x HDSDI according Input
Return loss	>15dB up to 750 MHz

## Physical Specifications

Dimensions	145x80x25 mm
Weight	200g
Power	5-12V DC/2W
